MANISH KUMAR SHARMA

Senior Software Test Engineer

Bengaluru, India | 9902123193 | Manishjangid85082@gmail.com
LinkedIn | Portfolio Website

PROFESSIONAL SUMMARY

Software Test Engineer with 8 years of experience across manual, functional, non-functional, and automation testing in the banking and insurance sectors. Well-versed in SDLC and STLC processes, with skills in test requirement analysis, test case design, API and security testing, ADA compliance testing, and AI-assisted testing using GitHub Copilot. Experienced in both Waterfall and Agile/Scrum delivery environments, with additional exposure to test automation and operational/recruitment activities.

CORE SKILLS

- Testing Types: Smoke, Sanity, Functional, Regression, API, Non-Functional, Security, ADA/Accessibility
- Automation: Java, Selenium, TestNG, JUnit, BDD, Hybrid Framework
- Tools: Postman, BurpSuite, Fiddler, JAWS, IntelliJ, Bitbucket, JIRA, ALM, Octane
- Database: SQL
- AI Tools: GitHub Copilot (certified)
- Methodologies: Agile (Scrum), Waterfall
- Processes: SDLC, STLC

PROFESSIONAL EXPERIENCE

Senior Software Test Engineer | Accenture — *2021 – Present*

US-based Banking Client | Agile/Scrum

- Perform test requirement analysis, test scenario preparation, test case creation, and peer review of test cases for a US banking client in an Agile/Scrum environment.
- Conduct ADA/accessibility testing using JAWS to ensure application compliance for differently-abled users.
- Leverage GitHub Copilot to analyze user stories and accelerate test scenario creation, and to review teammates' test cases during peer reviews.
- Support the automation team by contributing code for new functional requirements (Java, Selenium, JUnit, BDD framework).
- Manage stories and daily task tracking in JIRA; maintain test cases and defects in Octane.
- Handle operational activities including candidate screening for testing roles to meet client staffing needs, and coordinate employee engagement events as part of the Bingebees team in Bengaluru.
- Hold GitHub Copilot and Claude AI certifications for testing workflows; reduced story/requirement analysis time by 50% through AI-assisted workflows.
- Manage test cases across 17 releases and counting.

Software Test Engineer | Tata Consultancy Services (TCS) — *2018 – 2021*

UK-based Government Client | Insurance Domain | Waterfall

- Executed Smoke, Sanity, Functional, API, and Regression testing as a manual tester for a UK government insurance client.
- Performed non-functional testing including UI/look-and-feel validation and security testing using BurpSuite.
- Collaborated across multiple teams, primarily within the Functional Testing team, in a Waterfall delivery model.
- Transitioned into automation testing, developing automated test scripts using Java, Selenium, TestNG, and a Hybrid framework.
- Used Postman for API testing and ALM for test case and defect management.
- Performed device testing across Android and iOS platforms to validate application functionality and compatibility.

EDUCATION

Bachelor of Science (Computers) | *2015 – 2018*

M.E.S Degree College of Arts, Commerce and Science

CERTIFICATIONS

- GitHub Copilot Certification • Claude AI Certification
